Key Benefits

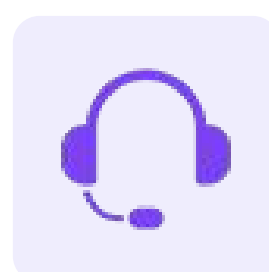

Removes background noise, echoes, keyboard clicks, and office chatter in real time

Improves call clarity for customer support, sales, and service teams

Supports a more professional calling experience across communication tools

Helps agents stay focused and communicate with confidence in noisy environments

Product Features

- ✓ AI-Powered Environmental Noise Cancellation
- ✓ Background noise reduction for clearer voice transmission
- ✓ Real-time Audio Filtering before the sound reaches the communication application
- ✓ Built for Contact Center use cases and business communication workflows

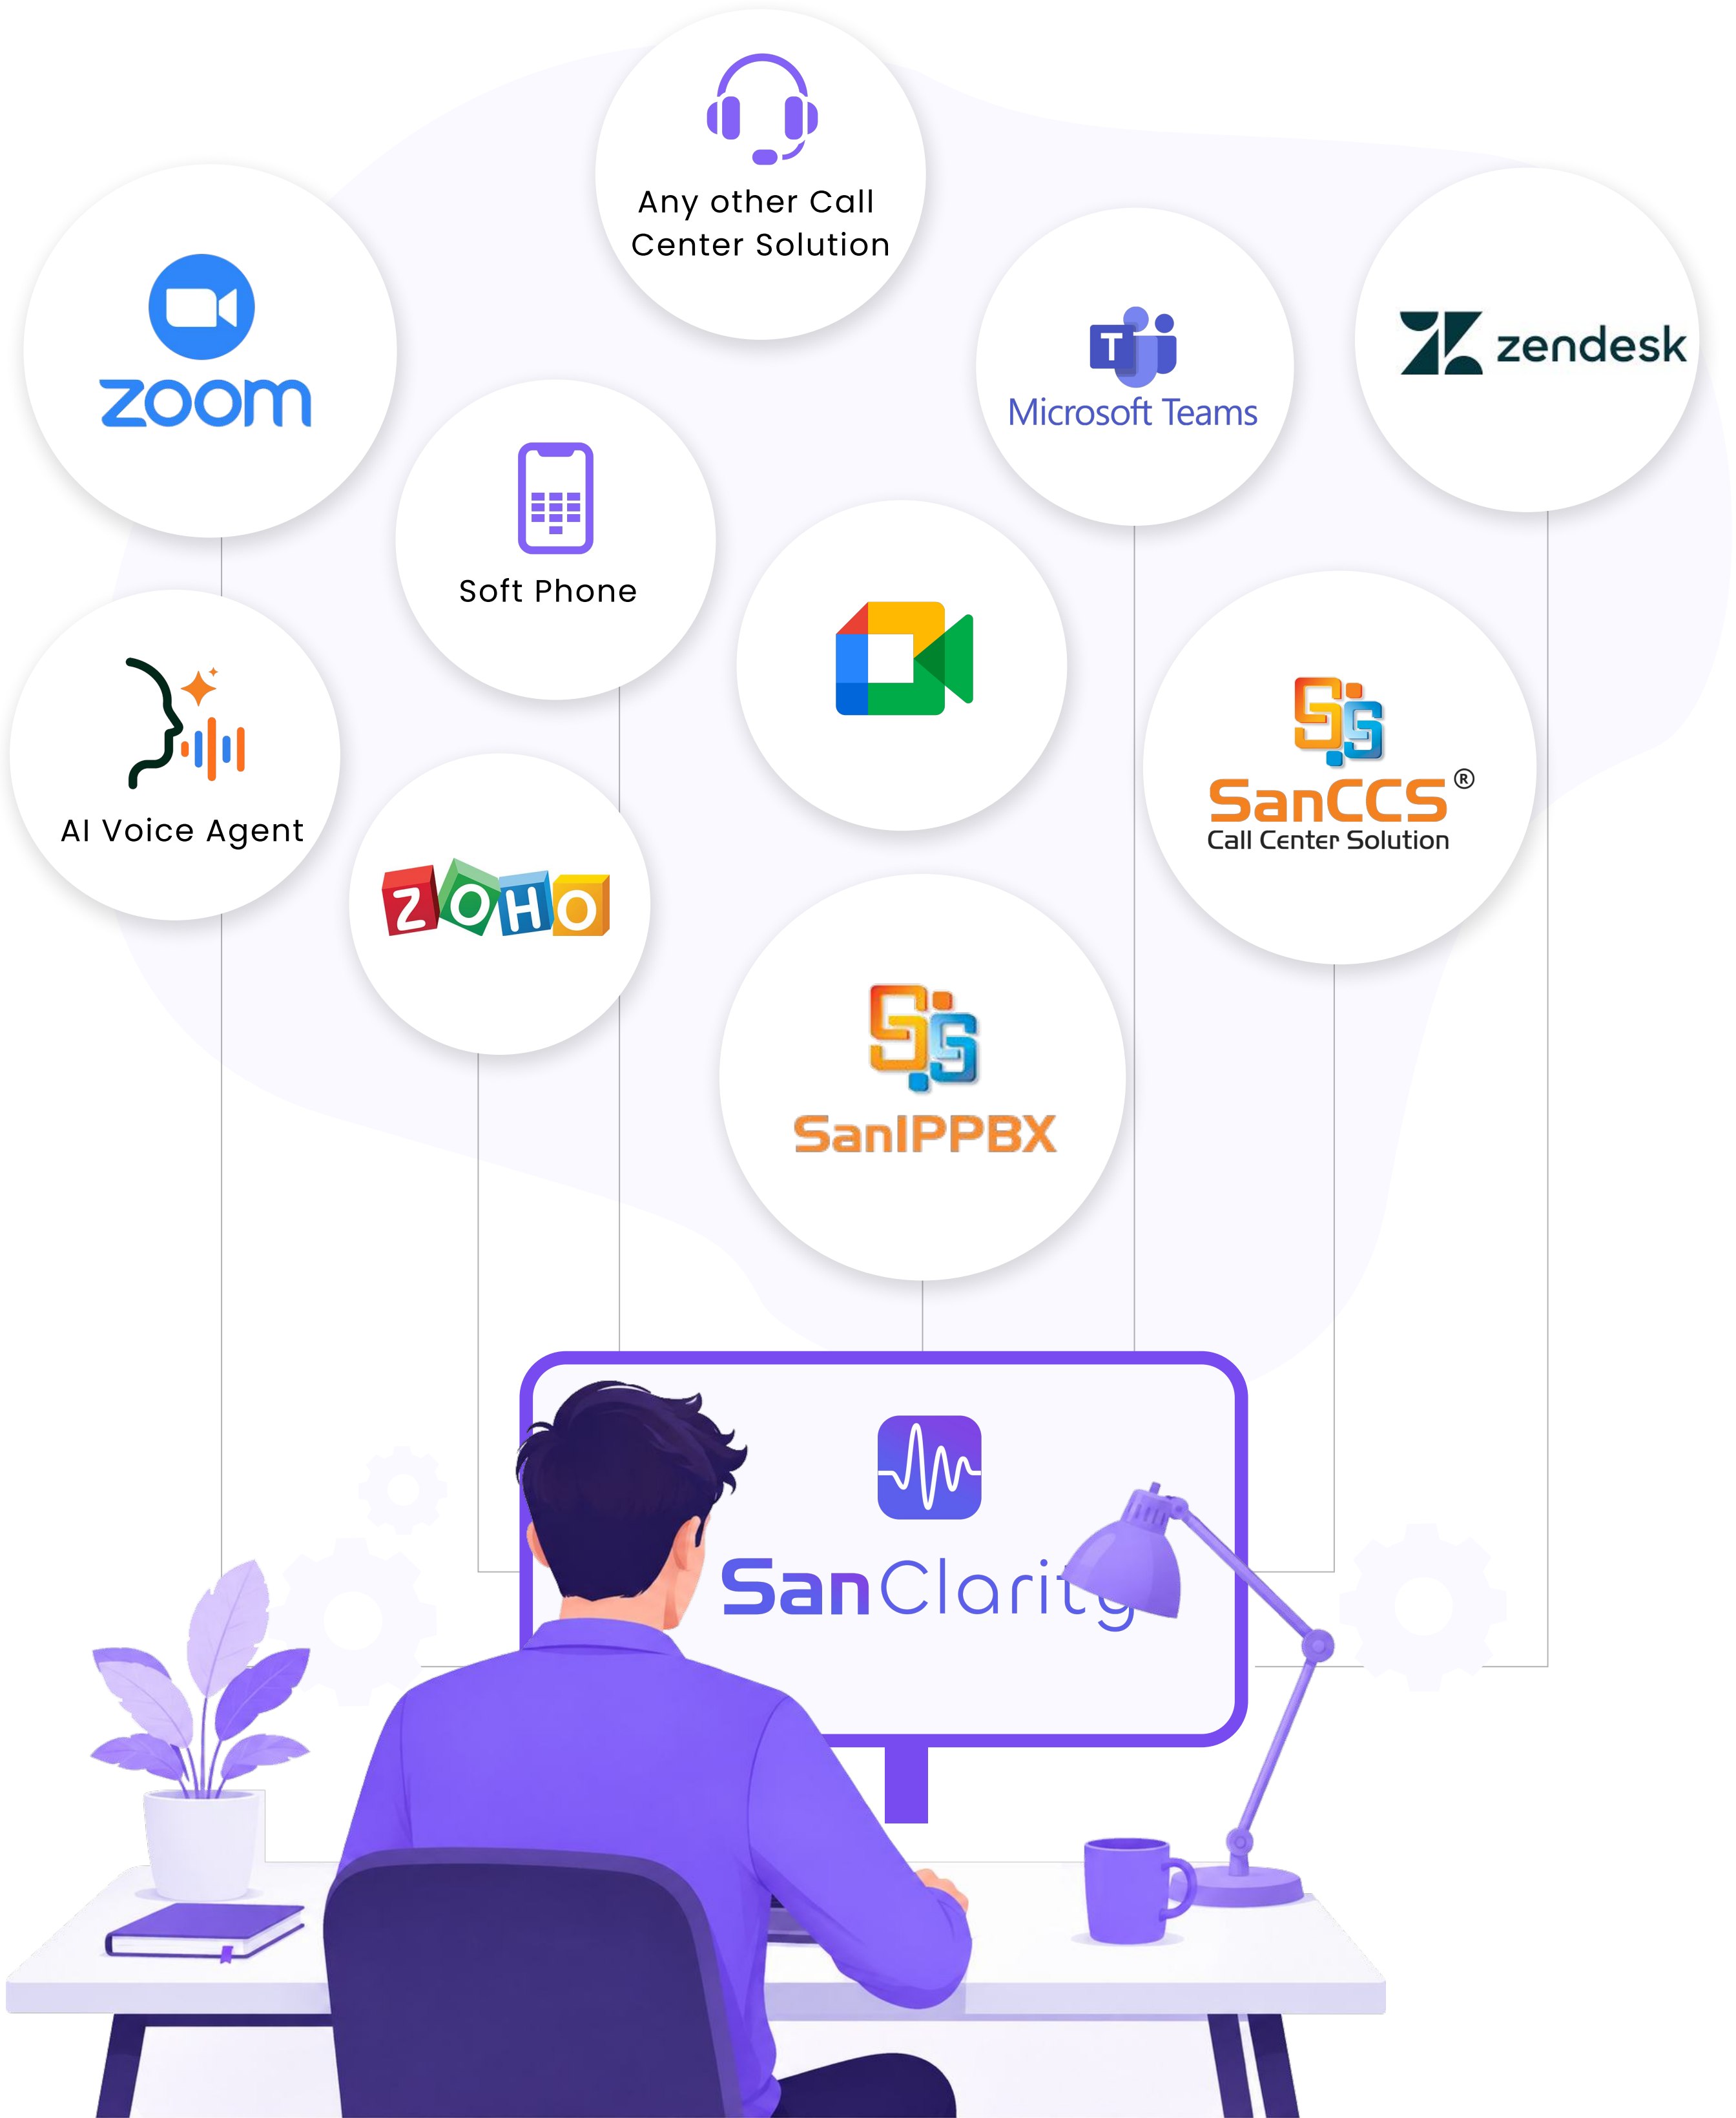

Why It Matters?

Poor audio quality can frustrate customers and slow down conversations. This solution is built to reduce friction in every interaction, helping teams sound more polished and efficient.

For organizations that rely on high-volume calling, better voice clarity can support stronger customer satisfaction and smoother agent performance.

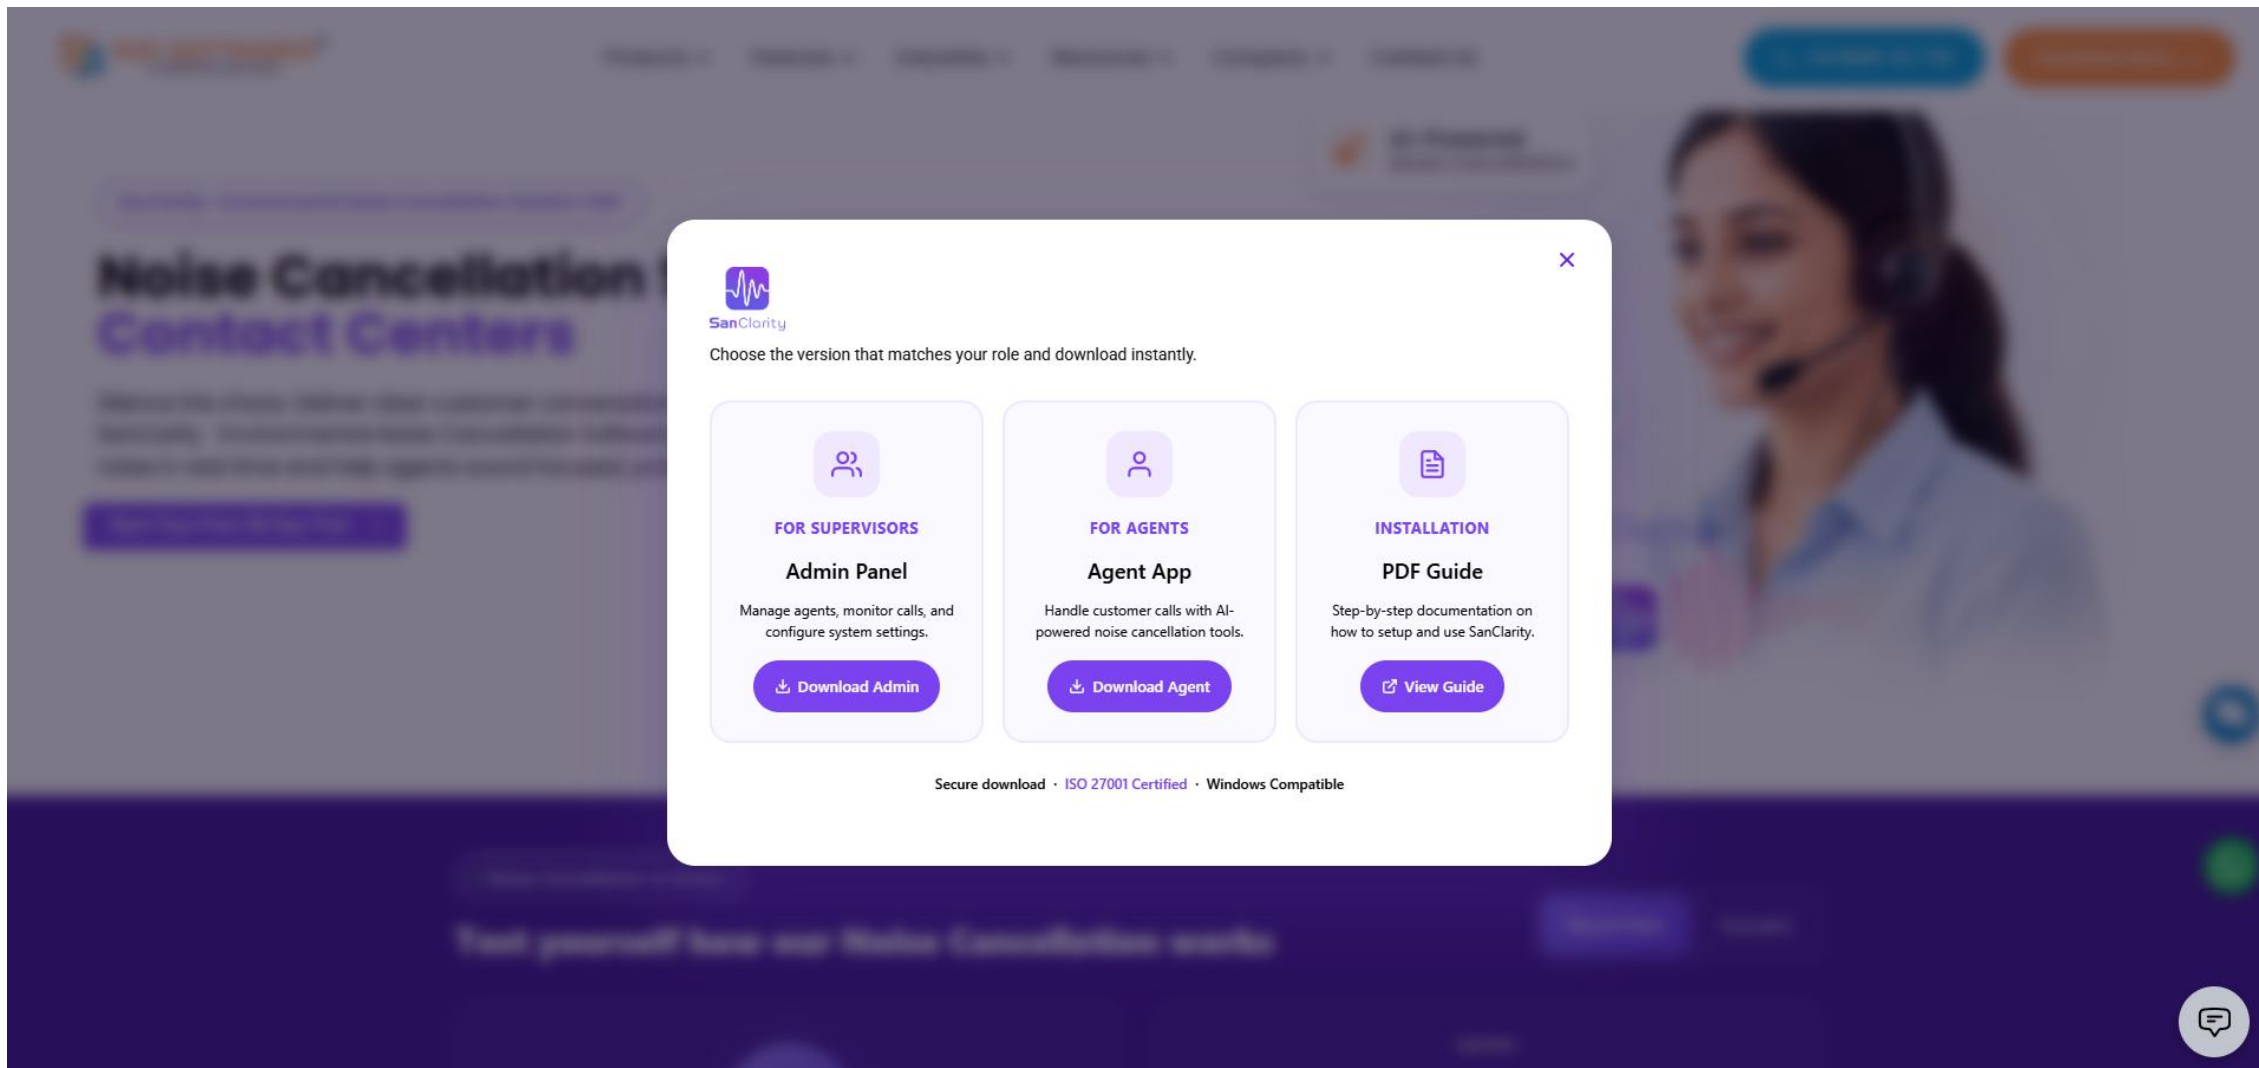

Works with All Platforms

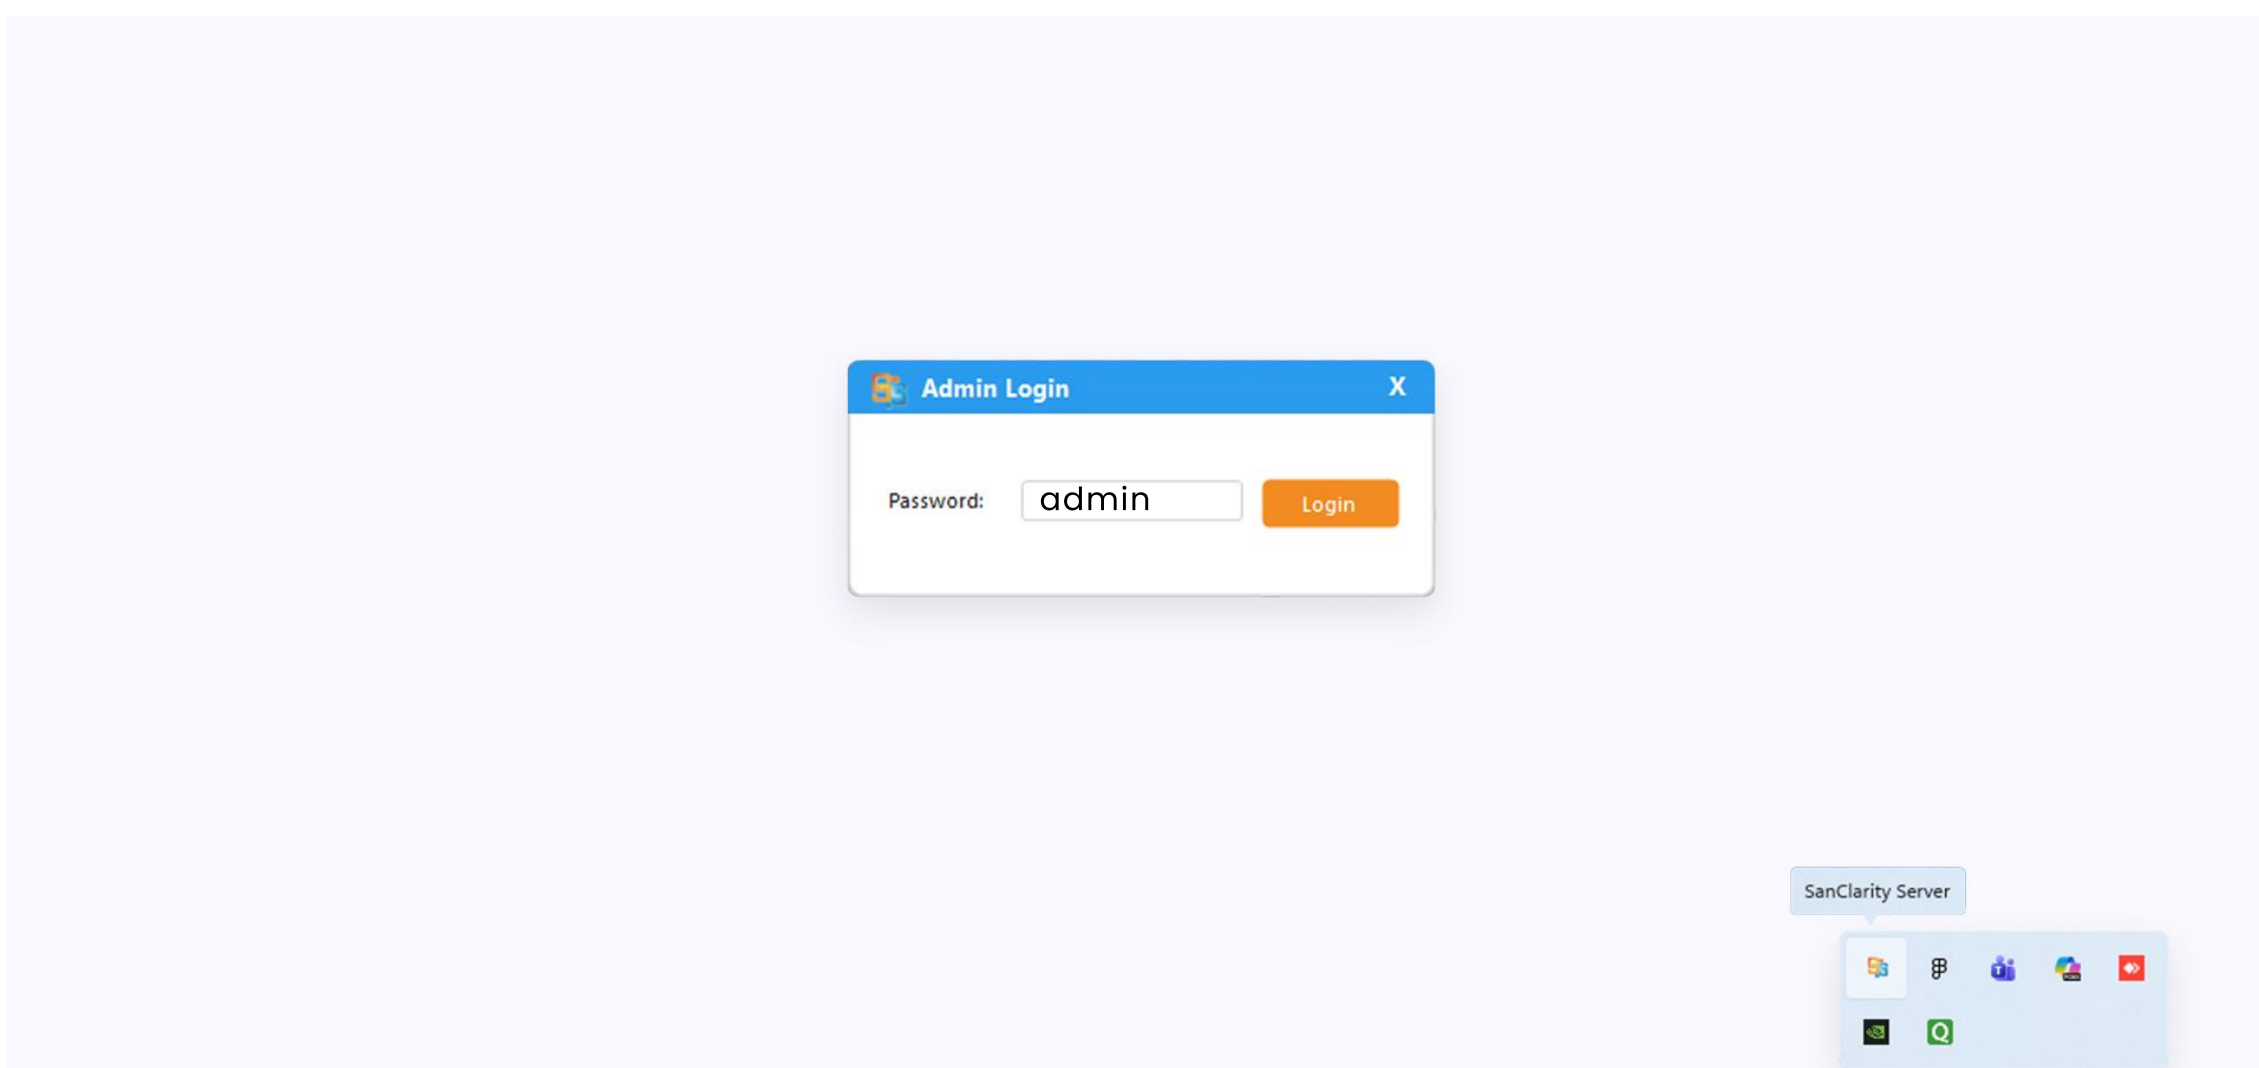

How To Install?

1 Download SanClarity

Visit the download page and choose the version that matches your role: the **Admin Panel** (for supervisors, to manage agents, monitor calls, and configure system settings) or the **Agent App** (for agents, to handle customer calls with AI-Powered Noise Cancellation Tools)

2 Accessing Settings

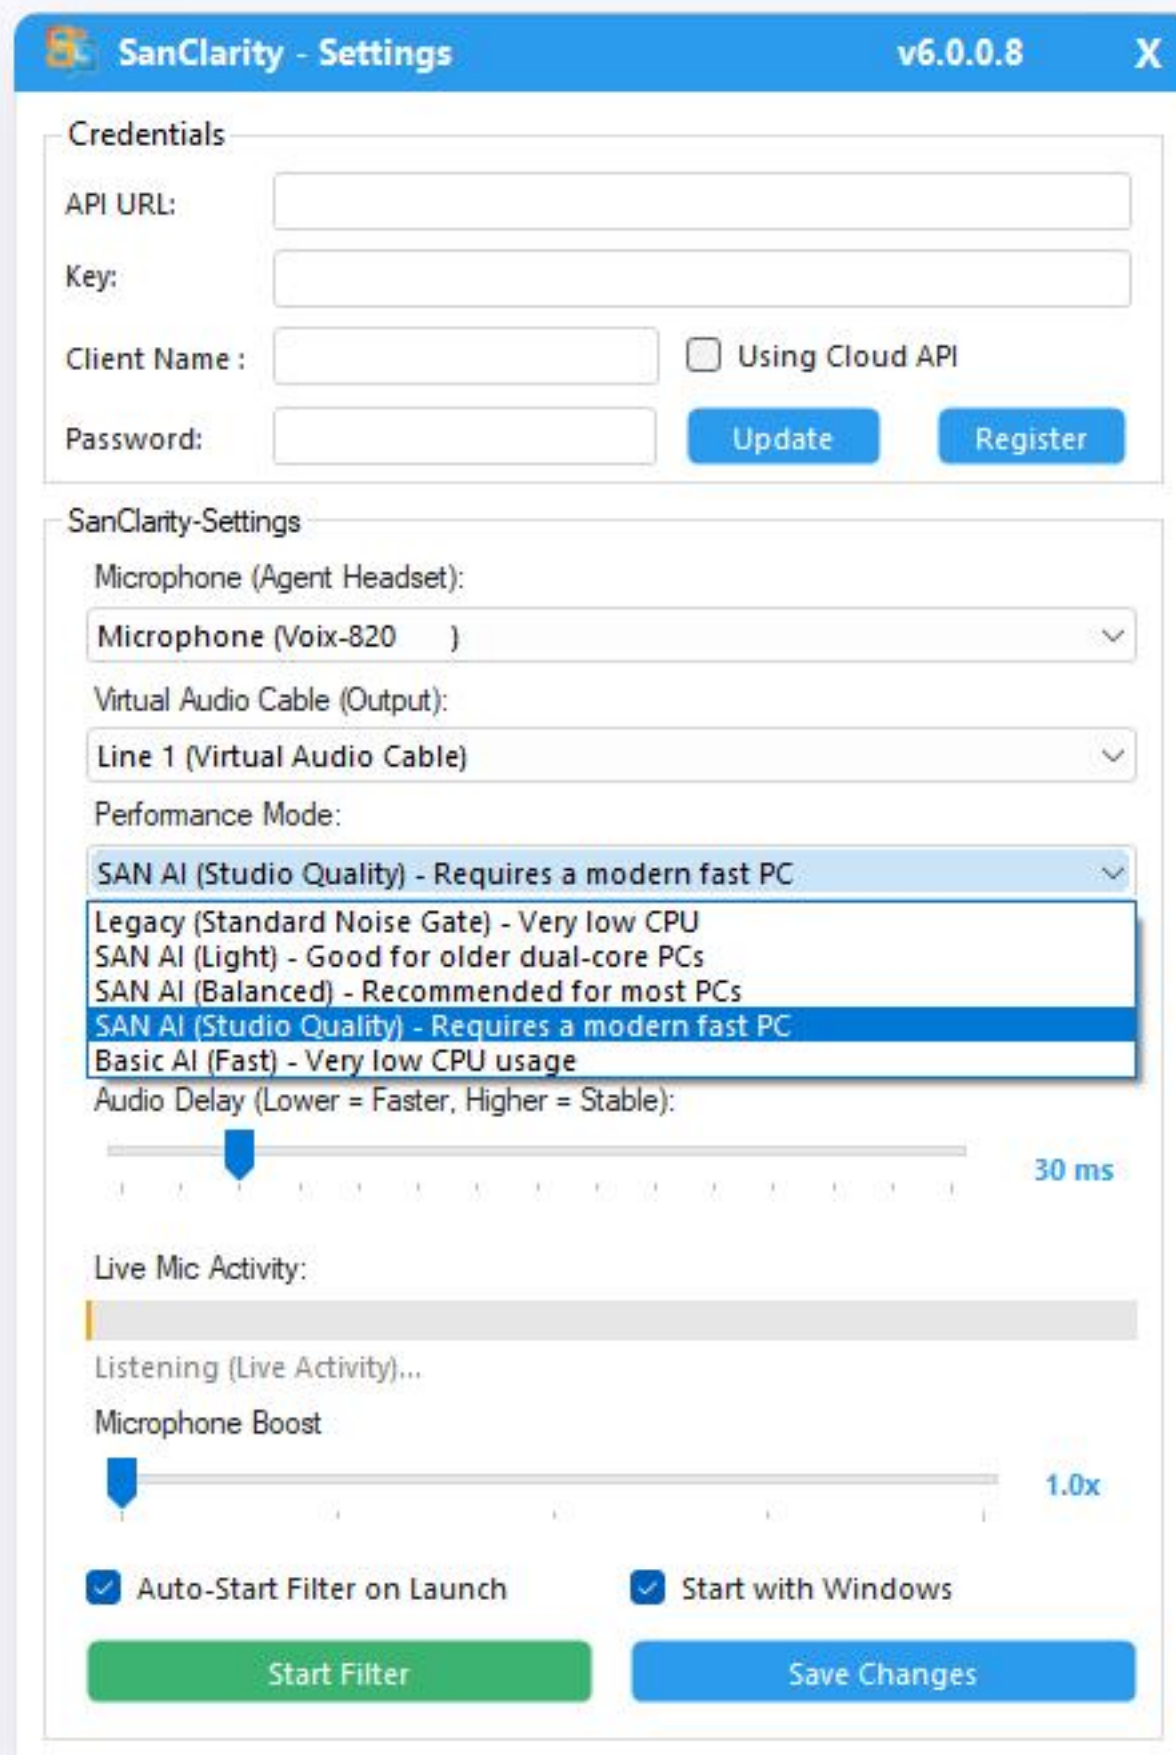

Right-click the SanClarity icon in the taskbar and select "Settings." You will be prompted to enter a password

Default password: admin

How To Install?

3 Settings Screen

The screenshot shows the SanClarity Settings window (v6.0.0.8). It is divided into two main sections: Credentials and SanClarity-Settings.

Credentials:

- API URL:
- Key:
- Client Name: ☐ Using Cloud API
- Password:
- Buttons: Update, Register

SanClarity-Settings:

- Microphone (Agent Headset):
- Virtual Audio Cable (Output):
- Performance Mode:
 - Legacy (Standard Noise Gate) - Very low CPU
 - SAN AI (Light) - Good for older dual-core PCs
 - SAN AI (Balanced) - Recommended for most PCs
 - SAN AI (Studio Quality) - Requires a modern fast PC
 - Basic AI (Fast) - Very low CPU usage
- Audio Delay (Lower = Faster, Higher = Stable):
- Live Mic Activity:
- Microphone Boost:
- Checkboxes: ☒ Auto-Start Filter on Launch, ☒ Start with Windows
- Buttons: Start Filter, Save Changes

The settings screen allows you to configure the following:

- **License Details** — View trial status or activate your license key
- **Microphone** — Select your physical microphone device
- **Virtual Audio Cable** — Verify the output routing device
- **Performance Mode** — Choose the Noise Cancellation Quality Level

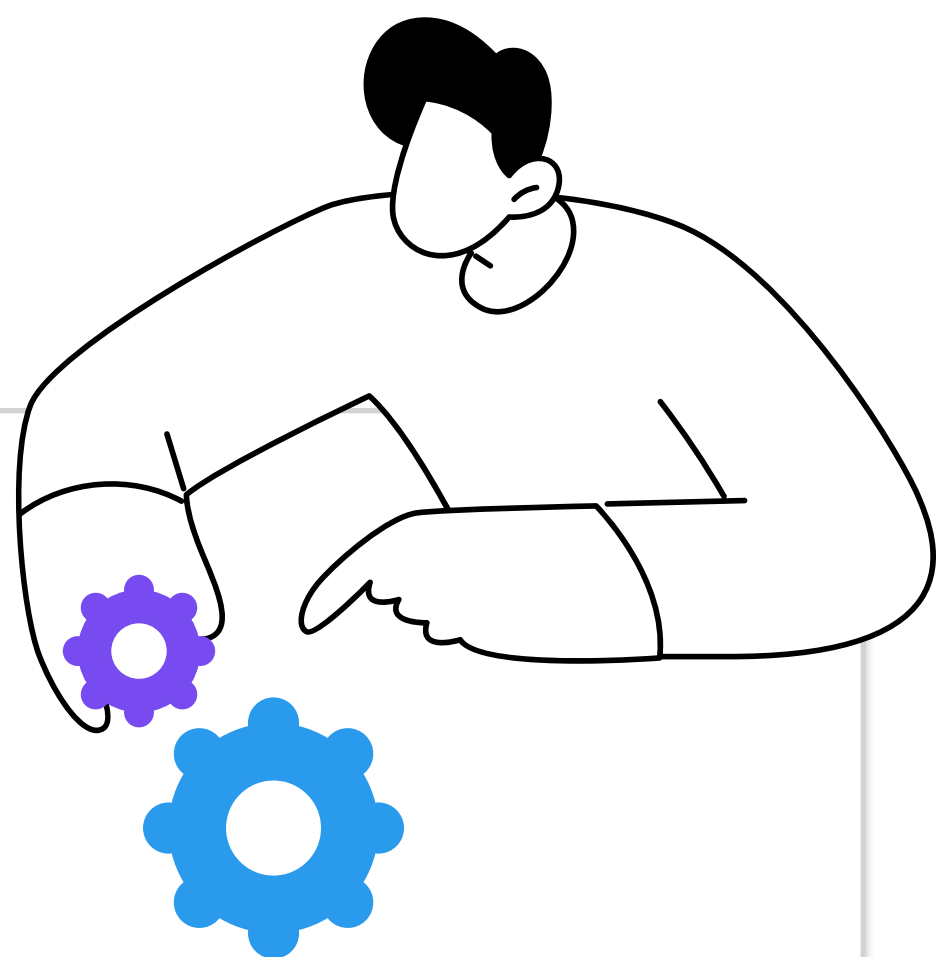

Make Every Call Clearer with SanClarity Noise Cancellation Software.
